Correction to: Predicting Intracerebral Hemorrhage Expansion With Noncontrast Computed Tomography: The BAT Score

In the article by Morotti et al, “Predicting Intracerebral Hemorrhage Expansion With Noncontrast Computed Tomography: The BAT Score,” which published online on April 18, 2018, and appeared in the May 2018 issue of the journal (Stroke. 2018;49:1163–1169. DOI: 10.1161/STROKEAHA.117.020138), a correction is needed.

On page 1166, in Table 2, the values in the row “Baseline ICH volume, median (IQR),” columns “Yes (n=62)” and “No (n=282),” are reversed. The “Yes” column should read “23.2 (10.4 – 38.3),” and the “No” column should read “14.0 (7.0 – 27.5).”

The correction has been made to the current online version of the article, which is available at https://www.ahajournals.org/doi/10.1161/STROKEAHA.117.020138.
